

My dummy preregistration

Olivier Morin

October 8 2026

I am abandoning Open Science Framework for all projects from now on. Here's how I'm transitioning.

I'm saving all my OSF projects (public and private) using this short script by Lisa de Bruine.

<https://bsky.app/profile/debruine.bsky.social/post/3mstpqq46o422p>

I'm going to do all my preregistrations with Github, using Github's Immutable release feature, coupled with zenodo via github integration for archiving.

I am testing this system with this dummy preregistration.
